

ROMANIA
"TRAIAN VUIA"
RESITA

"Traian Vuia" High school was founded in 1968 as an industrial high school, named Industrial High School Nr. 1, specialised in machine building. It continued its development until the Revolution of December 1989 brought novelty and also changed the course of events in our school. Since 1990 our industrial high school turned into a theoretical high school, named Theoretical High School Nr. 2. In 1991 the Physical Education and Sports High School was founded in Resita, as part of the Theoretical High School Nr. 2. In 2001 the Physical Education and Sports High school from Resita changes its name into Sports Programme Vocational High School, Resita. Considering the fact that over the years, it has given "wings" to its former students and graduates to follow their dreams it was assigned a name in accordance. As a result, in 2002, it was named the Theoretical High School "Traian Vuia" Resita, after the name of one of the greatest promoters of Romanian aviation, as a symbol of uplifting, of success, and development of every student, to raise awareness of the future being built through and for education. In 2004 Theoretical High School "Traian Vuia" merged with the Vocational Sports Programme High School, Resita. The school's vision: Theoretical High School "Traian Vuia" offers educational services at European standards, in a decentralized system which creates the premises of educational programmes and projects development, as well as viable cooperation, towards the desired accomplishment of PERSONAL DEVELOPMENT IN A COMMUNITARIAN SCHOOL.

The school's mission: „Traian Vuia” Theoretical High school is the environment where care and trust are above restrictions and threats and where every person is asked, helped and inspired to live with ideals and values, such as rightness, intelligence and responsibility.

Our school has classes structured on 2 pathways: theoretical and vocational, with math and sciences track (such as Mathematics-Informatics/intensive Informatics and Natural Science/intensive English), Humanities (such as Social Sciences and Philology), vocational-sports (handball and athletics).

Human Resources: Our school has now 824 students, grouped in 1 to 12 grades taught by 82 teachers.

Facilities:

Our school has a wide range of facilities:

- Classrooms with modern fitted furniture and computerised equipment
- teaching devices, equipment and materials for different subjects

- 2 gyms, an old one, for Physical Education and a new one, nationally approved for handball competitions, for the vocational school students.

- 2 laboratories with internet connected computers

Over time "Traian Vuia" Theoretical High school from Resita has gained a well-deserved reputation for the results obtained by the teachers and especially by the students who represent an elite of values in Resita.
